

MOTIONBUILDER™

Simply Powerful

MOTIONBUILDER™ will shatter all your preconceptions about 3D character animation, and save you time and money compared to traditional tools and workflows. Whether you're a **game developer**, or a creator of **episodic TV content**, MOTIONBUILDER™ has everything you need to take your projects to the next level. Step forward and embrace the **future of real-time 3D character animation**.

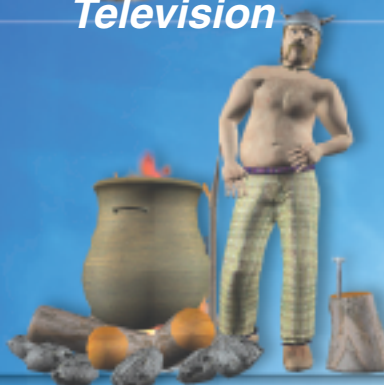

Kaydara MOTIONBUILDER™.
Simply Powerful Professional 3D Animation.

MOTIONBUILDER™ is designed to increase your productivity and streamline your workflow for projects in these sectors:

Game Development

Television

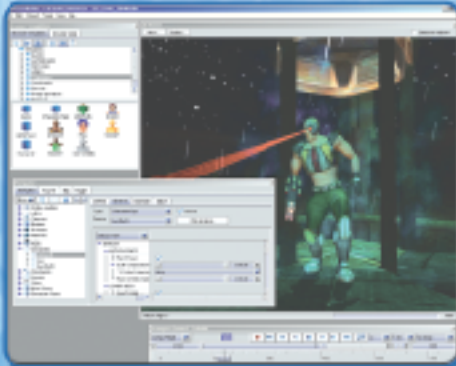

Web

MOTIONBUILDER™

Professional Real-time 3D Animation

Streamlined Workflow & Intuitive User Interface

MOTIONBUILDER™ features a production-tested workflow, designed to optimize resources and maximize your productivity when creating 3D animation. Easy to use **Drag-and-Drop Tools** mean anyone familiar with a window-based operating environment can manipulate MOTIONBUILDER's tools. No need to master complex key combinations.

Powerful Character Animation Tools

MOTIONBUILDER™ has the most comprehensive series of powerful 3D animation tools on the market. It is the only way to animate 3D quickly and easily, without having to program complex scripts or master arcane mathematical formulae.

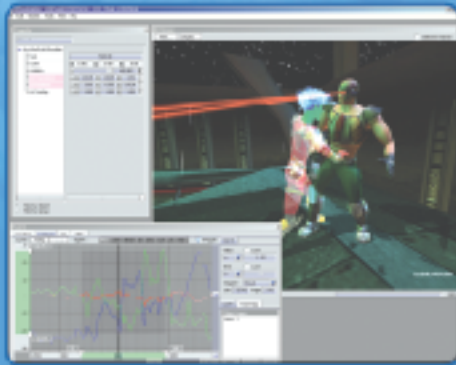

MOTIONBUILDER™ and FBX™

The Kaydara FBX™ file format, a comprehensive wrapper for 3D data, is a powerful format that allows content interchangeability between other supported packages, including Alias|Wavefront Maya, Newtek LightWave, Softimage XSI, and Discreet 3dsmax.

Comprehensive Toolset

A complete set of tools, including a powerful Fcurve editor, a motion-blending tool, and a dopesheet tool, makes editing and manipulating your animation a quick and easy process.

Professional Yet Affordable

Professional level tools that won't break your budget. Add value to your pipeline and simplify your workflow, so you save time and money on training, maintenance, and content creation.

Recommended Systems

CPU / Operating System
MAC OSX 10.1 or higher
Intel Pentium Processor

- Windows 2000 SP2, Windows XP (with OpenGL driver installed)
- Red Hat Linux 7.2 or higher
